

Every ambitious father wants to see his daughter well provided for. After she leaves his home he wants her to marry a man who can make her comfortable and happy. He knows the spendthrift can't do it. He knows the man who is chasing get-rich-quick bubbles will go broke. He wants a young man with a bank account, so does the girl-

Mc Leanshor , Ill.—"About five years ago," says Mrs. John L. Drew, of this place," I was afficted with pains and irregularity every month. I suffered continually, was weak and despindent, and unable to do my housework. I took Cardui, and in one minth, I felt like a new woman and worked bard all summer. I am and worked hard all summer. I am now in perfect heath, and recommend Cardui to all suffering woman." Every day, during the past 50 year. Cardui has been steadily forging ahead as a result of its proven value in female troubles. It relieves head ache, backache, womanly misery and puts fresh strength into weary bodies. Try it.-Advertisement.

Trenton, N. J., besides its potteres and rubber works, boasts of the sleepless wonder of the world in the person of Albert E. Herpin, whose statement that in the last fifteen disputed, though he has repeatedly been under the protracted observation of neurologists, psychologists any tests desired. Furthermore, Mr. Herpin claims that never once since his earliest recollections, to his knowledge, has he ever been to sleep, and that on the one occasion when a kind-hearted physician, desirous of giving him a novel sensation, administered opiates to him, the drugs made him seasick instead of sleepy.

Ancient Superstition,

The superstition about spilling salt t the table is ancient. In Leonardo da Vinci's picture of the Last Supper Judas has upset the salt cellar by an awkward movement of his elbow. The superstition was current then-in 1498when the picture was painted. The probability is that it dated back to the earliest century of the Christian era.

EASIEST INCOME FROM SHEEF

Small Sum of Money Required in Establishing Flock-Demand for Them Growing Stronger.

It has never been disputed that sheep are of great value on the farm. Some men who have had years of practical experience with sheep and have raised a flock in connection with other classes of live stock, declare that they have derived the largest and easiest income from sheep. From the standpoint of profit they consider: First, the small sum of money required for the establishment of a flock; see ond, the small expense incurred in

building suitable shelter for sheep; third, the little care sheep require in the summer, during the farmer's busiest time; fourth, the extermination of weeds on the farm by the sheep; fifth, the enrichment of the soil on which the sheep graze by the even distribution of their manure, which is of much years he has never slept one single value to the land; sixth, that with wink has never been successfully present prices of wool a breeding ewe ought to pay for more than her keep and that her lamb or lambs are their net profit; and, seventh, that since the demand for them is ever growing and physiologists, and professes his stronger, mutten and wool are conreadiness to submit at any time to stantly increasing in value,-Wiscon sin Bulletin 263.

BE CAUTIOUS WITH ALFALFA

Not Advisable to Feed Hay in Large Quantities to Brood Mares-Great Danger of Bloat.

It is not well to feed alfalfa hay in too large quantities to brood mares, and this is a matter in which precaution should be taken. Horses tend to become bloated if allowed to overfeed on alfaifa hay, especially if the hay is in a more or less green stage. It is always advisable when alfulfa hay is to be fed to horses to allow the alfalfa to remain in the field until well ma-

The danger of bloating in horses is especially great in the case of marcs in fonl, which are likely to overeat. These precautions are not necessary in feeding alfalfa to cattle and, in fact, the green alfalfa hay is very desirable for dairy cattle. Good results have been obtained in feeding broad mares by limiting their alfalfa to one-third of the total amount of roughage fed to

the hogs come up out of the dlp. By holding them on this incline for a fewminutes a great deal of the dip is saved by running off them and into the tank. The vat proper is 16 inches wide at the bottom, 24 inches wide at the top and 4 feet deep. It is 10 feet

COLONY HOUSES NOT COSTLY

Material May Be Bought for Price Ranging From \$7.35 to \$17.43-Much Depends on Type.

According to the practical experience of the agricultural experiment station at Ames, a very satisfactory colony of movable hoghenses may be built at a cost, for material, ranging from \$7.35 to \$17.43, depending upon the type. In no case does the cost of labor add more than \$3.75 to the total cost. These movable houses have been used for a good many years at Ames. They are declared successful by John M. Evvard, who is in charge of the experimental work to animal husbandry. With Prof. J. B. Davidson, Mr. Evvard has recently completed a bulletin which gives complete plans and specisentions for six different types of movable houses. The publication may be secured without cost by writing to he Bulletin editor, Acres, Iowa, for it.
